Education

Jaypee Institute of Information Technology Bachelor of Technology in Electronics and Communication,	NOIDA, INDIA CGPA 8.0	2026
Lions School, Mirzapur, India	Aggregate Percentage 85.0	2021
	Aggregate Percentage 90.4	2019

Professional Experience

APAR Industries Limited - Conductors Division

Intern - Product & Business Analysis | June 2025 - July 2025, India

- Conducted SWOT analysis on 7 competitor companies, identifying key strengths, weaknesses, and market positioning gaps
- Translated complex product data across 5+ categories into structured business recommendations, bridging technical specifications with strategic pricing decisions
- Applied data analysis techniques (trend analysis, comparative analysis) to derive insights
- Designed and presented structured insights to senior management, converting raw competitive data into actionable positioning strategies

Projects

Library Management System Using SQL

- Developed a complete relational database in MySQL to streamline library operations, tracking book inventory, customer transactions and branch information.
- Authored complex SQL queries using JOINS, aggregate functions, and subqueries to generate reports on book availability, employee salaries, and customer patterns.
- Performed schema modifications post-creation using ALTER TABLE to update column definitions and added new columns with foreign key constraints to link employees to branches.

Intelligent Document Q&A Agent using RAG and LangChain

- Built an end-to-end RAG pipeline using LangChain, ChromaDB as the vector store, and Gemini/OpenAI API to answer user queries from uploaded PDF documents with grounded, hallucination-reduced responses
- Engineered prompts using zero-shot, few-shot, and role-prompting techniques to control agent persona, tone, and response format for different user types
- Implemented multi-turn conversational memory using LangChain's ConversationBufferMemory, enabling coherent context retention across follow-up questions
- Evaluated agent performance using structured test cases measuring relevance, response accuracy, and edge-case failure modes – iterating on prompts based on results

Skills

Languages Python, C++, SQL

Skills Prompt Engineering, Large Language Models, Vector Databases, RAG

Tools Power BI, MySQL, OOPs, ChatGPT, DBMS

Additional Quantitative Aptitude, Problem Solving, Management Skills, Presentation Skills, Communication Skills
